

Company name : “ **Futures First** ”

Common suggestions :

- It is a market analyst role. Puzzles, mathematics and aptitude are asked.

- The working hours of this company are long, so consider it and it is not related to engineering role.
  - More than CTC, you will get more bonus.  
If you succeed in this role, you can make a lot of money.
- Do some research in the company, they will role out a form which consists of hr questions. Answer them which suits the company.
- Learn DSA , which will be helpful in answering aptitude type questions too .
- The main important topics that are asked in all three rounds are aptitude , mental mathematics , (questions on this asked in every round), probability , SQL
- Should be confident about the role selected (Quant role , Trading role , Software role , Analytics role)

OT Questions :

- Mostly based on topics related to aptitude , basic mathematics , Markets.

Interview Questions :

- Basically , this will be done in two rounds(technical rounds).

1<sup>st</sup> Interview:

1. Fast maths like with closed eyes you have to calculate(multiplication of numbers were asked)

36\*28,23\*14 .... (4 to 5 questions)

2. Asked about the role (market analyst)
3. A question based on trading.
4. Asked about the company (Futures first)
5. The timings are bit odd. So asked about timings
6. Asked logical reasoning questions (one is finding sequence of letters) (one is on numbers)
7. And few basic HR questions

2<sup>nd</sup> Interview :

1. Orally told a 20 digit number and asked me to remember and asked me at the end of the interview again.
2. Asked multiplication of 2 numbers like  $117 * 117$ . Asked me to walk through my solution (basically mental maths) and other multiplication also.
3. Mostly it is HR. But it was harsh because he wants to test how much I am able to take stress.
4. Few stress questions. I answered with my experiences how I actually handle my stress and how I handle multiple tasks and basically about my character and qualities. Gave examples from my position of responsibilities.
5. Asked questions about money and basic questions on trading and techniques if you know any
6. Examples :  $a+b=123123$ .  $a, b$  are prime numbers. Find them
7. j, f, m, a, \_\_ find the 5<sup>th</sup> alphabet, it is not m.
8. J, A, S, O, \_ what is the next alphabet?

HR Round :

1. Introducing about yourself

2. About company
3. Any further plan of higher studies
4. Any desired place for working
5. About interns
