

About the event

To mark **World Standards Day 2025**, IIT Bhubaneswar and BIS jointly in association with the Research and Entrepreneurship Park (IIT Bhubaneswar) are jointly organizing an event on the theme “*Shared Vision for a Better World: Spotlight on SDG 17 – Partnerships for the Goals.*” International Standards are a cornerstone of global collaboration, ensuring interoperability, fostering trust, and accelerating multi-stakeholder cooperation to drive sustainable development. This year, the World Standards Day will explore how standards provide a shared framework that enables meaningful collaboration across industries, governments, and organizations to achieve common objectives. The campaign will highlight concrete examples that demonstrate the power of partnership and the impact of working together through standards.

Program Highlights

Technical Talks & Panel Discussions- Engage with experts from BIS, industry, and academia on cutting-edge developments, standards, and innovations.

Hackathon- A dynamic platform for individuals or teams to propose innovative, feasible solutions to real-world challenges focusing on strategy rather than prototypes.

Science Exhibition- Open to school and college students, showcasing creativity and scientific curiosity. Exciting cash prizes worth ₹10,000 for winners!

About Bureau of Indian Standards (BIS)

The Bureau of Indian Standards (BIS) is India's National Standards Body under the Department of Consumer Affairs. Established in 1946 as the Indian Standards Institution (ISI), it became BIS through the BIS Act, 1986, and was further empowered by the BIS Act, 2016. BIS sets standards for products, processes, and services, provides certification (e.g., ISI mark, Hallmarking), ensures product quality and safety, protects consumer interests, promotes industrial development, and supports trade and global competitiveness.

About IIT Bhubaneswar

IIT Bhubaneswar, founded in 2008, is a leading hub of innovation and technology in India. Nestled at the foothills of the historic Barunei Hill, its 936-acre campus in Argul, Odisha features cutting-edge infrastructure and excellent connectivity. The institute's Engineering and Basic Sciences departments drive advanced research in materials, semiconductors, electronics, computational sciences, vehicles, energy storage, green hydrogen, smart cities, and sustainable manufacturing.
