AIIMS Delhi and IIT-Bhubaneswar officials sign the MoU in Delhi

Bhubaneswar: AIIMS Delhi launched a health-education initiative with the IIT Bhubaneswar Research and Entrepreneurship Park (IIT Bhubaneswar REP) to strengthen mental-health capacity and modernise medical training across the country.

The collaboration was formalised through a newly-signed MoU in Delhi recently that set out 2 projects aimed at postgraduate doctors and frontline healthcare workers. The programmes are designed to combine clinical training with technology-enabled learning methods, with an emphasis on practical

Nationwide Health Reset: AIIMS Delhi & IIT Bhubaneswar REP Team Up to Rewire Doctors' Minds with AI and Gamified Training

Bhubaneswar, 7th January 2026: AIIMS Delhi has launched a major health-education initiative in partnership with the IIT Bhubaneswar Research and Entrepreneurship Park (IT Bhubaneswar REP). Under a newly signed Memorandum of Understanding, the institutions will collaborate on two pioneering projects in mental health and medical training.

The first project – AASHA – HOPE (MANASA SANTULAN) will focus on training postgraduate doctors in mental health using advanced, AI-driven habit-building tools designed to improve clinical practice and self-care. The second project (EVERYDAY HERO – GAMIFICATION OF TRAINING FOR HEALTHCARE WORKERS) will apply gamification techniques to make training for healthcare workers more engaging, practical, and outcome-oriented. Both projects will be implemented with the domain experts of IIT Bhubaneswar REP, Thinkspace Edutech.

Together, these initiatives are expected to benefit all AIIMS campuses and more than 75,000 postgraduate doctors across India, marking a significant step towards strengthening the country's healthcare workforce and driving a new phase of innovation in medical education.

Bhubaneswar: The premier health institution, the All India Institute of Medical Sciences (AIIMS) Delhi, has launched a health-education initiative in collaboration with the IIT Bhubaneswar Research and Entrepreneurship Park (IIT Bhubaneswar REP) to promote mental health care and enhance medical training across the country.

IIT Bhubaneswar sources said under a newly signed Memorandum of Understanding (MoU), the two institutions will jointly implement two pioneering projects aimed at strengthening the skills and well-being of healthcare professionals.

The first initiative, AASHA–HOPE (Manasa Santulan), will focus on training postgraduate doctors in mental health through advanced, AI-driven habit-building tools. These tools are designed to enhance both clinical practice and self-care among medical professionals, news agency UNI reported.
